

AMRAD  **MEDICAL**

Radiographic Systems

AMRAD MEDICAL™ Advantage OTS

The Advantage OTS is ideal for sophisticated imaging environments where accuracy and efficiency are paramount. Gliding smoothly through a complete range of motion, the OTS delivers superior flexibility and precision to perform a full range of anatomical studies. Broad specifications allow for flexible installation in rooms with ceiling as low as 9 feet.

Premium Imaging Suite

Easy to Operate

Riding on stainless steel bearings, OTS ensures vibration-free movement for fast, seamless travel and precise patient positioning.

Superior Through-Put

The crystal-clear digital SID readout allows for fast and meticulous patient positioning.

Safe & Accurate

The fully counterbalanced, telescopic column with zero drift ensures safe and accurate operation. Electromagnetic locks control all tube movement.

Highest-Capacity Elevating Table

A more powerful motor safely and seamlessly supports patients weighing up to 650 lbs.

AMRAD MEDICAL™ Advantage OTS

AMRAD MEDICAL™ Advantage DFMT

The Advantage DFMT is a world-class system designed for demanding hospital radiology departments, orthopedic and urgent care clinics or imaging centers. The DFMT is feature-rich and provides maximum flexibility for optimal patient care.

High Volume Leader

Increased Through-Put

The crystal-clear digital SID readout allows for fast and accurate patient positioning for improved workflow.

Highest-Capacity Elevating Table

A more powerful motor safely and seamlessly supports patients weighing up to 650 lbs.

Built To Last

A heavy duty, continuous-column tubestand allows for stable floor-mounting.

AMRAD MEDICAL™ Advantage DFMT

AMRAD MEDICAL™ Advantage FMT

The Advantage FMT is a high-quality alternative to the DFMT. The robust FMT offers the versatility & functionality of the DFMT with an analog SID readout for more conservative imaging budgets.

Quality and Volume Alternative

Excellent Value

The choice of Manual SID positioning makes the FMT more cost-efficient without sacrificing image quality.

Highest-Capacity Elevating Table

A more powerful motor safely and seamlessly supports patients weighing up to 650 lbs.

Built To Last

A heavy duty, continuous-column tubestand allows for stable floor-mounting.

AMRAD MEDICAL™ Classic FWFC

When x-ray imaging is only one of the services you offer, the Classic FWFC ensures fast payback. The Classic's Tubestand design maximizes the imaging capabilities of medical practices with limited space.

Compact & Versatile

Rugged and Efficient

Wall mounting allows for a smaller overall footprint. Wear-resistant steel tracks offer extended tubestand travel for off-table procedures.

Low-Volume Alternative

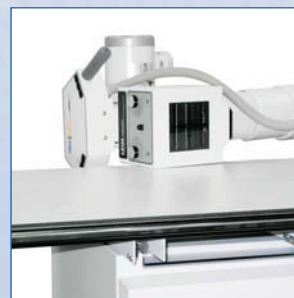

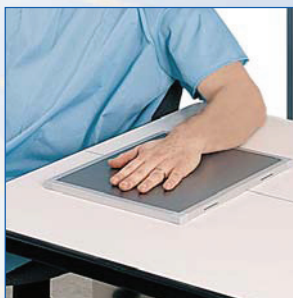

Flexible configurations allow us to customize the Classic to fit the needs of any imaging department.

High-Capacity Elevating Table

A powerful motor safely and seamlessly supports patients weighing up to 400 lbs. Recessed foot controls within the table-base enable hands-free operation.

Flexibility

Rotational and Transverse S225 tubestand allows for complete table top coverage.

AMRAD MEDICAL™ Suites

Whichever configuration you select, your AMRAD MEDICAL™ Suite includes hospital-grade components designed for high patient throughput and years of useful life within your facility. Our robust equipment design ensures that you will have maximum uptime and low cost of ownership for your investment.

Digital-Ready

Upgrading to a digital imaging platform is easy with all AMRAD MEDICAL™ Suites. AMRAD MEDICAL™ Suites can support any CR or DR (cassette-sized) flat plate and are offered with all powers of generators and x-ray tubes for even the busiest digital imaging suite.

Customizable Solutions

AMRAD MEDICAL™ designs and manufactures a wide range of imaging solutions for medical practices of all sizes and budgets. All configurations offer a choice of high-performance imaging components, x-ray tubes and generators to create the right room for your specific needs.

About AMRAD MEDICAL™

AMRAD MEDICAL™ is known for ongoing product development and quality workmanship in radiographic systems and components. Each component has been designed for long-term durability in high volume facilities. Backed by a best-in-class warranty, AMRAD MEDICAL™ radiographic equipment offers exceptional performance, reliability and long-term investment value.

American Made

AMRAD MEDICAL™ x-ray systems are built in America. Our ISO 9001 certified factory is located in Chicago, Illinois, USA and has been manufacturing quality imaging systems for more than 25 years under the same ownership. With our support staff and parts inventory on-site, AMRAD MEDICAL™ shipments are fast and convenient for our customers. AMRAD MEDICAL™ is known for its best-in-class shipping performance. Spare parts ship within one day.

Global Support

AMRAD MEDICAL™ radiographic systems are backed by an exclusive, worldwide dealer network that provides immediate support and service. Our exceptional group of seasoned radiographic professionals is committed to providing unequalled products and service.

Industry-Best Warranty

Backed by the industry's best warranty, an AMRAD MEDICAL™ Suite will provide your practice with hospital-grade radiography well beyond your expectations.
