

Breeza®

Flavored Beverage for
Small Bowel Distention

Breeza® flavored beverage for small bowel distention was designed by a radiologist to overcome the disagreeable taste and texture patients experience in other commonly used distending agents.

Available in two flavors, patients can choose between a **lemon-lime** or **mixed berry** flavored beverage.

Breeza for small bowel distention is preferred among enterography patients for its flavor and low viscosity.

- Preferred by 21 of 23 members of Crohn's Disease Focus Panel¹
- Improved drinking compliance among pediatric patients²
- Reduced nasogastric intubations among enterography patients from 7% to 1%³

Lemon-Lime

REF 221
QTY 24, 16.9 FL OZ (500 mL)
bottles per case
sugar-free, gluten-free

Mixed Berry

REF 222
QTY 24, 16.9 FL OZ (500 mL)
bottles per case
sugar-free, gluten-free

*Used in CT and MRI with adult
and pediatric patients*
